Training can be completed at client specific sites including offices and offshore locations.

Learning Outcomes:

- Legislation, regulations and guidance associated with Potable water and Legionella control and the legal status of employer, contractor and employee responsibilities.
- The environmental conditions that are required to be present in order for bacteria to become virulent and for infection to occur.
- Management control schemes implementation and delivery.
- Risk areas within domestic hot and cold water systems.
- Understanding, identifying and managing specific risks due to offshore and marine design / operation factors.
- The requirements for the provision and maintenance of a wholesome potable water supply.
- Specific risk areas including Legionella risk control.

- Testing methods including hands on practical session on infield analysis.
- Microbiological, chemical and physical factors influencing water quality.
- Additional control measures including, intervention, inspection, disinfection, design and monitoring.

Bolt on modules:

OWM have developed many Bolt On Modules that are designed to offer further education into specific areas of offshore and marine environments.

Some of the Bolt On Modules currently on offer are:

- ❖ Complete Norwegian Legislation
- ❖ Complete Dutch Regulations
- ❖ Crisis Management
- ❖ Marine focused Legislation
- ❖ Potable water & saturation diving.
- ❖ Area and Country Specific (Africa, GOM, Canada etc).

Bolt On Modules have been designed to last between 30 – 45 mins and can be easily combined/added onto all other courses.

Certificate / Awards:

IIRSM Accredited Certification

Cancellation/Invoicing terms:

Please note that invoices are processed immediately upon securing a delegate place on the requested course and payment is required within our normal terms of 30 days. Should the need to cancel arise, delegates will be offered a place on the next available course free of charge. Thereafter there will be a £100 administration fee associated with further rescheduling of course attendance. Clients may also transfer this delegate place to another individual. OWM must be informed of any non-attendance before the commencement of the course. If OWM are not notified this will constitute a use of the place on the course.
