

Hydropulse P3 goes on trial with Gulfmark UK

Hydropulse P3 is a portable biocide dosing unit specifically designed for the offshore supply industry. The unit measures flow and proportionally doses the correct amount of biocide, to ensure all potable water has a free chlorine reserve. Supplied in a Peli-case the revolutionary dosing unit is sure to hit the industry by storm.

Hydropulse P3 is currently going on trial with GulfMark UK on the Highland Guardian vessel.

Maritime Labour Convention – Are you compliant?

Maritime labour convention covers a whole host of topics including Drinking Water. **“The shipowner and the master of a ship must ensure that drinking water is provided on the ship which is suitable in respect of quantity, nutritional value and quality”**

Are you compliant with the statement? Are your storage tanks cleaned annually? Is your hot water always above 60°C?

OWM can help to make sure you are compliant!

Maritime & Coastguard Agency

Trihalomethanes, Benzene. Speaking Gobbledygook?

Fuel Oil, Potable & Drill water, Lubricants & FIFI results can all be difficult to understand so why not get the professionals into help?

OWM specialist technical team, sample and analyse all types of fluids and materials to deduce results into workable data. Data that everybody can understand and act upon.

Did you know Boron is a key indicator of water maker malfunction? Want to know why, get in contact!

Don't understand test results? Talk to us

Are you sampling for Legionella correctly?

Risk assessment out of date? You are not compliant!

Rig and vessel specific procedures? Something to think about?
