

## OFFSHORE SPECIALITY CHEMICALS

It is imperative to ensure the correct chemical is always available, ensuring the system is treated effectively, thus preventing bacterial growth, corrosion, etc.

### Introduction

OWM offer a comprehensive range of chemical products developed to mitigate risk, enhance efficiency and effectiveness and prolong the life of environmental and other control systems. OWM can supply a range of specialist chemicals, ranging from chemicals for the potable water system to the corrosion inhibitors for cooling systems. All chemicals are fully approved by the relevant bodies.

OWM are at the forefront of supplying new chemical solutions, such as AOB. AOB is a specifically designed biocide to allow for effective disinfection rates on all bacteria. AOB is designed to have longer stability times ensuring disinfection occurs throughout the whole potable water system.

OWM also supply:

- Sodium hypochlorite for potable water treatment
- Water maker chemicals and components such as re hardener minerals and water maker cleaners.
- Biocides for fuel systems and environmental systems
- Chemicals for system decontaminations and cleans

If you require any further information regarding the above, please contact the CCS Team at [sampling@owmgroupp.com](mailto:sampling@owmgroupp.com) or call 01224 766641.

**CEFAS APPROVED CHEMICALS**

Offshore Water Management is an independent provider of all services and support associated with water management within the offshore industry. This includes the design, supply, installation, management and maintenance of all offshore potable water systems. Our customer base includes Offshore Operators Drilling Companies and all types of marine support companies associated within the offshore industry.

### SERVICES

- Professional Technical Support
- Water System Audits
- Certified Training (Tailored specifically to the Marine and Offshore Industries)
- Dosage and Control Equipment
- System pipework replacement and refurbishment
- Field Testing Kits
- Management Control Procedures and Protocol
- Record Keeping and Reporting Software Systems
- Legionella Risk Assessments
- Accredited Laboratory Chemical, Physical and Microbiological Testing
- Consultancy
